

Thankyou for downloading our

*Nature Loose Part
manipulative flashcards*
28x cards

How to use:

These flashcards are designed for you to use how you please in your classroom or childs play. They are created simple and are designed to get children creating each image/pattern using your own NATURE loose parts.

Children will learn hand eye coordination, learn patterns, learn to pay attention and use eye for detail while replicating each pattern and image as best as they can.

Children should be encouraged to create their own versions with what nature loose parts YOU HAVE or FIND (colours,materials) but stick to the same pattern on flashcard.

Some ideas include:

- Set up your flashcards on your nature or loose part table as invitations to play, get your child to create each patter/image using loose part on the table or tray.
- Use flashcards in you maths lessons when learning about patterns and geometry.
- Take these to your forest or bush kindy groups and get little ones to collect leaves, flowers,and rocks to create each flashcard: get them to pick one flashcard each to create.
- hang on your walls in your classroom/learning space (tip: DOUBLE PRINT and cut out each image box to just have the pattern image, use these in memory match games,sensory bins,posters etc)
